IP8 Restricted Key System

Security where it counts

We are pleased to release dormakaba's latest inline restricted key system. The features of the IP8 system will enable effective management of the security of your premises and peace of mind. The IP8 system offers security, flexibility and quality in one complete package.

Design Registered Keyway

The Kaba IP8 Restricted keys and cylinders are an inline profile with standard space and depth. The keys are not multi-profiled and are covered by Australian Design registration till 2024. This gives you peace of mind that your keys are safe and can't be copied.

Pick resistant key broach

The IP8 complex profile design makes it much more secure and resilient against lock picking attacks.

Features

- The IP key range is made of nickel silver, with a large key head, for ease of use for the elderly or disabled.
- We offer 5 different colour inserts which prove a great visual aid to assist with the identification of keys.
- Kaba can provide a variety of plug types available to suit various lock applications.
- The IP8 range includes cylinder housings to suit all major commercial and residential lock types.
- All IP8 components have been designed by Australian industry experts to the highest standards.

Advantages at a glance:

- Large key head, for ease of use for the elderly or disabled.
- We offer 5 different colour inserts.
- The IP8 range can be construction keyed, master keyed, keyed to differ or keyed alike.
- Suitable for commercial and residential.
- All IP8 components meet the highest standards.
